

DASHBOARD

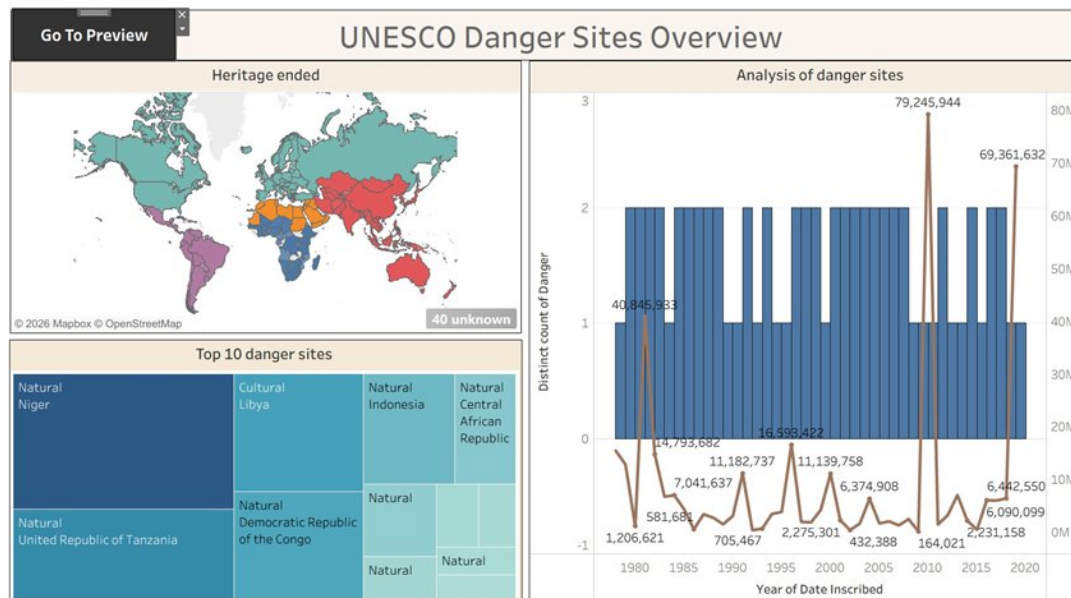

UNESCO World Heritage Sites Overview

This dashboard provides an interactive overview of UNESCO World Heritage Sites across the world. It displays site distribution by category, region, country, and year of inscription, helping users understand global heritage trends through maps and charts.

UNESCO Danger Sites Overview

This dashboard focuses on UNESCO World Heritage Sites that are listed as endangered. It highlights the geographical distribution of danger sites, top affected countries, and year-wise analysis, enabling users to identify regions requiring urgent conservation efforts.

STORY

Story 1 – UNESCO Site Overview

The first story presents the overall analysis of UNESCO World Heritage Sites. It explains the distribution of Cultural, Natural, and Mixed heritage sites across different regions and provides insights into historical inscription trends using interactive visualizations.

Story 1

Story 2 – UNESCO Danger Site Analysis

The second story focuses on endangered heritage sites. It summarizes the major risk

areas, top countries with danger sites, and year-wise changes, helping stakeholders understand conservation priorities and support better heritage protection planning.
